The tgs Difference

TRULY GREEN SOLUTIONS

Since our founding in 2010, Truly Green Solutions has been a pioneer in the new and revolutionary field of solid state lighting. We continue to remain an established leader and manufacturer of LED lamps and luminaires for commercial, municipal, and industrial lighting. Every day we challenge ourselves to discover the latest technologies for premium and efficient LED solutions that do their part to help the world through inspiration, innovation and illumination.

Our success is a result of inspiration and commitment to innovative and superior technologies, an extensive and relevant product line, specification grade and niche products, and the needs of our customers.

Backed by industry-leading five to 10 year warranties on every product, TGS ensures that our products perform above industry standards by undergoing rigorous testing and certifications with nationally and locally approved organizations. Employing cutting-edge technology, TGS defines itself by providing high-quality LED lamps and luminaires with higher lumen outputs, intelligent engineering and reliable components.

ECO™

The TGS Eco™ Edge Lit panel provides an efficient and elegant LED replacement for fluorescent lamps and troffer fixtures in offices, schools, hospitality, healthcare and other commercial and industrial applications. It provides flicker-free, uniform lighting, with an on-board driver that allows bypass of existing ballasts for quick, easy and safe installation.
