

DARK SKY COMPLIANT ALP™ E2 Adjustable Area & Site Light

SUPERIOR LIGHTING PRESERVING THE NIGHT SKY

Experience quality outdoor lighting with the ALP™ E2, meticulously engineered to meet dark sky compliance standards. This Dark Sky Friendly fixture eliminates uplight pollution with zero uplight and a warm 3000K color temperature. These specifications ensure your outdoor spaces are beautifully illuminated without compromising the night sky.

Equipped with a fixed arm mount design, the ALP™ E2 guarantees a reliable and consistent performance. The robust mounting system enhances the fixture's stability and ensures long-lasting functionality, making it ideal for residential areas and commercial sites.

Moreover, the ALP™ E2 offers a community-conscious lighting solution that prioritizes safety and visibility. Reducing glare and minimizing light trespass creates a safer and more comfortable environment for pedestrians and drivers alike. At the same time, it supports environmental stewardship by protecting nocturnal wildlife and maintaining the natural ambiance of the night.
