

**WARNING**

**PLEASE READ ALL INSTRUCTIONS BEFORE ATTEMPTING INSTALLATION**

- To prevent personal injury or product damage only licensed electricians should attempt to install
- To avoid electric shock or component damage disconnect power before attempting installation or servicing.
- This product must be installed in accordance with the current National Electric Code (NEC) and all applicable federal, state and local electric codes and safety standards.
- Disconnect product and allow cooling prior to servicing.
- Any alteration or modification of this product is expressly forbidden as it may cause serious personal injury, death, property damage and/or product malfunction.
- To prevent product malfunction and/or electrical shock this product must be properly grounded.

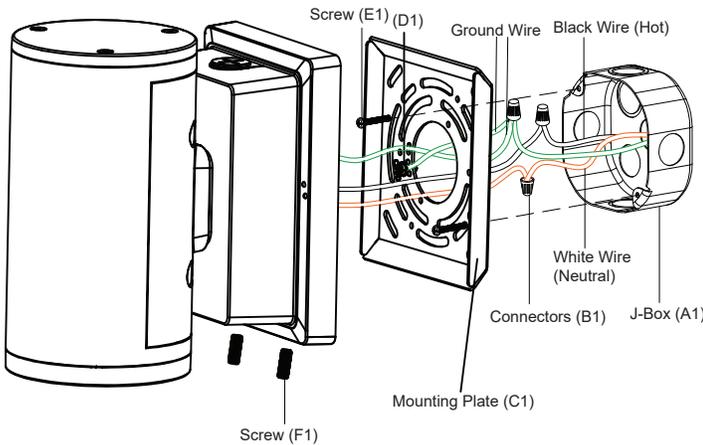

**Preparation:**

1. Shut off the power at the circuit break and remove existing fixture , including the crossarm.
2. Carefully unpack you new fixture and layout all the parts on a clear area. Note: Do not lose any small parts necessary for installation.

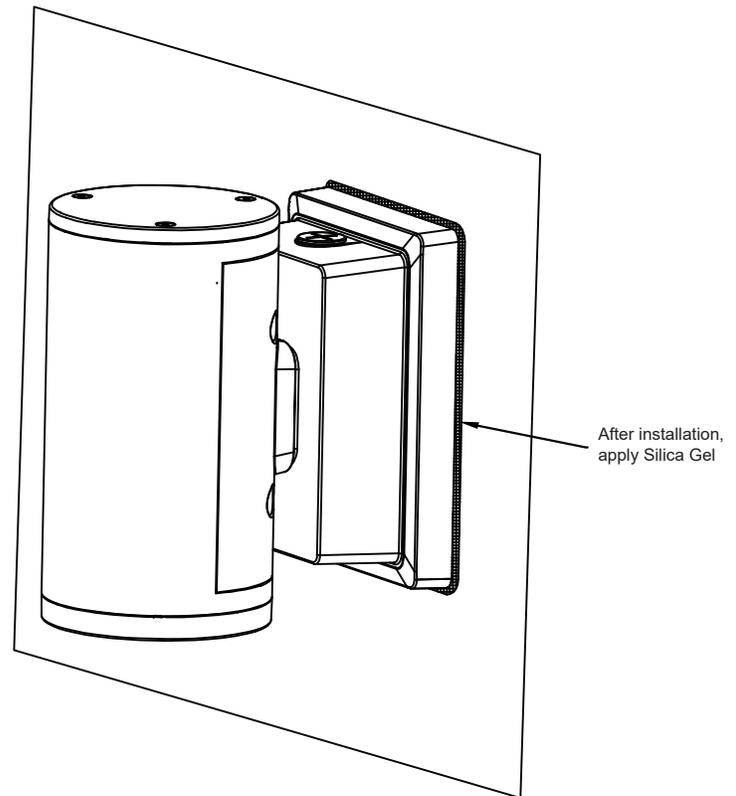

**Mounting The Fixture: (Fig.1)**

3. Secure the mounting plate (C1) to the junction box (A1) using junction box screws (D1). The side of the mounting plate marked “ GND” (C1) must be facing out. Connecting the wires (Fig.2)
4. Connect the electrical wires shown in Fig.2 ensure that all wire connectors (B1)are secured. If your outlet box has a green or bare copper ground wire, connect the fixture’s ground wire to it. Otherwise, connect the fixture ‘s ground wire directly to the mounting plate (C1) using the green screw (E1) provided.
5. Place the fixture over the mounting plate (C1) and secure it with screws. Completing the Installation (Fig.3)
6. To prevent moisture from entering the outlet box and causing a short, use clear caulking (i.e indoor/outdoor silicon sealant) to outline the outside of the fixture back plate where it meets the wall leaving a space at bottom to allow moisture a means to escape (Fig.3)
